

# Designed Specifically for The Zoom Platform

## “Now You See It, Now You Don’t. The Magic of Disappearing Blocks” - Lecture

I will show you the magic and beauty of disappearing blocks with this interactive online lecture, demo and trunk show. Learn how simple blocks can be used to easily create very complex looking quilts. Discover how to use color to reveal secondary patterns and how different block arrangements can create totally different looks.

I will be using 3 cameras: one on me and the quilts, one pointing straight down at the cutting mat, and one for close ups of the quilts. I will be able to show you step by step how easy it is to create something beautifully complex looking from a simple starting block.

Using the Zoom format, you will be able to make comments and ask questions during the lecture. Best of all, everyone has a front row seat!

## “Making Magic, a Disappearing Block Sampler Quilt.” - Workshop

This 6-hour workshop will be structured like a "sew along". There are 9 blocks and I will teach each one in turn. I have 3 cameras: one on me, one on the sewing machine, and one pointing straight down at the cutting mat and pressing surface. I will demonstrate how to make the block along with little tips on accurate piecing and pressing. The students will follow along and take turns showing the class how their block came out. The Zoom features allow me to answer questions immediately and help anyone who might be having a little trouble. As some students finish before others, I

will show other possible layouts and talk about things like how to enlarge the pattern or use different colors and how these blocks might look in a finished quilt.
