

## November Workshop

### Supply List

#### Machine Quilting with a Walking Foot

Sewing Machine with a walking foot. This class is all about learning to use your walking foot! No free-motion. Remember to bring your walking foot.

Thread to match your quilt, cotton or silk covered cotton.

About 100 one-inch safety pins

Machine needle 80/12

Thread clipper or small scissors

You will be required to make the quilt and bring batting and backing. We will baste with safety pins.

Blue marking pen or sew-line pencil

If you have simple stencils with mostly straight lines or gentle curves you can use them on this quilt. Also, Quilting-On-A-Roll paper with simple designs would be useful. I recommend these patterns—Diamonds, Zig Zag, Cable, and Stars. These will be used on the border.

Quilt—make 5 nine patch blocks, cutting the squares at 3 ½". Set the blocks together with an alternate square. I added a small inner border of background fabric-cut at 1 ½". Outer border cut at 4". This will make a top about 35" square. You will need 1 ¼yards of backing fabric (you will not have to piece the back!).

Batting slightly bigger than the quilt top. Cotton or 80/20 batting is best to learn on.
